

Hello, as is typical with most politicians, you seem to be siding with the organizations with the most money and influence instead of the people that control the votes that put the people in office that appointed you all to your positions. It's time to start paying attention to the voters, the people that were meant to run this country, but have somehow allowed that control to be forgotten and lost. Pure and simple, keep your meddling fingers out of the free enterprise system and REJECT NAB's petition 04-160. This petition is a pathetic attempt by the conglomerate that is the American Press to eliminate a strong competitor that is taking market share from them. Since they can not seem to beat XM Radio fair and square, they are trying to use their political clout to squash XM. This makes me sick to my stomach. The American government should be encouraging this type of competition among business to make sure the American public gets quality products at quality prices. Remember, you work for the public, the voters, NOT big business.
